

Response to Comments For
Pitlik & Wick, Inc.
Air Quality Construction Permit
Permit No. SYN-LDF-5577738024-2014-01

On September 4, 2014, the U.S. Environmental Protection Agency issued for public comment a draft Air Quality Construction Permit, permit number SYN-LDF-5577738024-2014-01, for Pitlik & Wick, Inc. The public comment period for the draft permit ended on October 3, 2014. During the public comment period, EPA received one comment.

This document provides a summary of all comments received during the public comment period and EPA's response. This document also lists any changes made to the permit or TSD.

Comments from Ms. Ginger Schwanebeck

During the public comment period, EPA received a fax from Ms. Ginger Schwanebeck in which she expressed support for the final issuance of the draft permit. Ms. Schwanebeck did not request a change to any of the permit's conditions.

EPA's Response to Ms. Schwanebeck's Comments

We thank Ms. Schwanebeck for her letter expressing support for the permit.

There were no changes to the permit as a result of this comment.

Other Changes to the Permit

During the public comment period, EPA identified several issues with the permit. The identification and explanation for changes made to the permit and TSD are included, below.

- 1.) Page 2 of the draft permit included a blank page. We have removed the blank page in the final permit. Page numbers have been updated as a result of this change. There were no substantive changes to any permit condition.
- 2.) Minor typographical and formatting issues were corrected throughout the permit. There were no substantive changes to any permit condition.
